for student-patient interaction: the
EPITOME model 58
- Animals, Animals for teaching purposes:
medical students' attitudes 39
- Anxiety, Effect of anxiety on performance
in multiple choice examination 297
- Assessment
A new method of assessment of clinical
teaching: ROC analysis 150
Educational assessment of general
practice experience for psychiatric
trainees 159
King's graduates evaluate the
effectiveness of their course 173
abst
Students' perception of good and bad
teaching: report of a critical
incident study 193
- Association for the Study of Medical
Education
Annual Meeting, September 1994,
abstracts 172
Resourcing changes in the medical
curriculum. A report on an ASME
Workshop - 28 February 1995 382
- Attitude
Animals for teaching purposes:
medical students' attitudes 39
- Audit: trainers' and trainees' attitudes
and experiences 85
- Comparison of medical and non-
medical student attitudes to social
issues in medicine 273
- Patients' assessment of trainee general
practitioners 91
- Australia
Australian medical education in a time
of change: a view from the
University of Sydney 181
Comparison of teachers at a
'traditional' and an 'innovative'
medical school 104
Development and implementation of
an innovative intern training
programme 220
Ethical reasoning and decision-
making in the clinical setting:
assessing the process 29
Initial responses of first-year medical
students to problem-based learning
in a behavioural science course:
role of language background and
course content 198
Longitudinal reliability of the Royal
Australian College of General
Practitioners Certification
Examination 317
Mandatory HIV testing of patients and
professionals: bringing ethics into
practice 360
Skin cancer training programme:
evaluation of a postgraduate
training for family doctors 364
